Applicant's arguments filed on 30 March 2004 have been fully considered. Claims 1-12 are therefore allowed with the arguments received from the Applicant and the additional limitations included. Claims 13-18 have been allowed in the previous Office action.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance: In regards to claims 1-12, the prior art of record in this application fails to disclose or reasonably suggest a dispersion compensation module that includes a dispersion slope inflection point at a wavelength near the 1550 nm nominal signal wavelength of the optical communication system so that the smallest residual dispersion occurs at the inflection point. Applicant further discloses a specific definition for the inflection point, where the inflection point is a point on a curve where the 2nd derivative is zero, in other words, where the curvature changes from negative to positive or from convex to concave or vice versa. Lastly, the previous Office action, mailed 31 December 2003, states the reasons for allowance of claims 13-18. Therefore, claims 1-18 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference A discusses an inflection point, however, does not discuss an inflection point used in a dispersion compensation manner. Instead, the inflection point is used for an ink jet memory.
